Uline

Kitchener, ON

Dear Recruiting Manager,

I am writing to express my interest in the Business Analyst position at Uline. With over three years of experience as a Power Platform Developer specializing in research, reporting, and analysis, I can deliver high-quality solutions to your organization and contribute to your ongoing success. My proven track record of enhancing operational efficiency by 30% and increasing customer satisfaction by 20% demonstrates my ability to exceed performance expectations.

As a Deployment Manager at Tata Consultancy Services (TCS), I successfully managed end-to-end production deployments of PowerApps and Power BI dashboards. This involved overseeing all stages from development to production environments, including custom connectors and Power Automate flows. My work resulted in zero escalations and seamless migration of 15 applications, leading to a 30% reduction in post-migration issues and a 25% improvement in user onboarding time.

My strong proficiency in PowerBI, PowerApps, Virtual Agents, Power Automate, and SQL enables me to provide data-driven decision-making solutions. For example, I developed custom Power BI dashboards that offered actionable insights into deployment trends and performance metrics, contributing to continuous process enhancements, and supporting informed decision-making.

I am excited about the opportunity to bring my expertise in data analysis, Power Platforms, and web development to your team. My skills and experience will make a meaningful contribution to your organization. Thank you for considering my application.

I look forward to discussing how I can be an asset to your team.

Sincerely,

Maanush Majmudar
